PATENT

REMARKS

After entry of the foregoing amendment, claims 22-40, 42, 43, and 51-70 remain pending in the application.

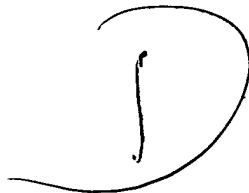

Claims 44-50 are cancelled without prejudice to applicant's right to pursue commensurate protection in a continuing application.

Certain of the remaining claims are amended in accordance with a telephonic interview with Examiner Cangialosi, putting all pending claims in condition for allowance.

In the interview, each of the independent claims, and selected ones of the dependent claims, were discussed. In addition to the art earlier of record, the undersigned and the Examiner also discussed cited references by Wang, Philibert, and Greenway. The Examiner also referenced non-patent art in the fields of counterfeit-resistant drivers' licenses, and fluorescent and other markings of currency to deter counterfeiting.

The amendments to claims 22-24 were made to overcome a possible § 112 "intended use" issue that might exist by reason of the deleted "suitable" term.

The term "blank" was added to claims 26 and 32 to clarify that the claims addressed blank photographic papers. Claim 51 was amended to clarify that the claim is addressed to photographic emulsion articles, with patterning coextensive with the article. The remaining amendments were made to improve the claims' readability and § 112 definiteness.
